Accessible Infographic Hub for KCGI Students
A Comprehensive Guide to Academics, Culture, and Life in Kyoto

- Presented by: Arielle_GR_12
- Course: Leadership Theory
- Group Supervisor: Arielle Ariane
- Date: 11th Jan,2026

Project Overview: What We Built

- Created a fully functional, accessible website: https://sdphoton.github.io/
- Developed an interactive infographic hub for KCGI students
- Included key sections: Academics & Research, Kyoto Practical Guide, Explore Kyoto (with landmarks & seasonal events), Logistics & Mapping, About Us and Support
- Features: Embedded interactive map (OpenStreetMap and Google Map), external resource links, student focused guides

Purpose & Motivation

- To bridge the gap between KCGI's advanced IT curriculum and the rich cultural experience of living in Kyoto
- Help international and new students thrive academically and personally in Japan's ancient capital
- Provide a one-stop resource for practical logistics, cultural etiquette, academic info, and tourism
- Empower students to balance studies with immersion in Kyoto's UNESCO heritage and traditions

Our Team: Roles and Responsibilities

- Lucero, Leus Santos(M25W0643): Web Developer and QA Group Leader
- Dhakal Sagar(M25W7443): Frontend Designer and Programmer
- Khanal Khina(M25W0707): Web Design
- D. Ayesha Maduwanthi(M25W7493): Web Development
- Hossain Zumon(M25W7480): Web Designer
- Bhandari Asna(M25W0707): Research and Information Gathering
- Pyakurel Ananta(M25W7487): Research and Information Gathering

What Makes Our Hub Special

- Academics: Detailed Academic Concentrations
- Practical Guide: Cultural rules, budgeting, utilities, waste sorting, student perks
- Explore Kyoto: Visual guides to shrines/temples, seasonal events, cuisine
- Logistics: Residency, banking, transport, emergencies
- Interactive elements: Maps, hyperlinks, contact supports

Outcomes: What We Achieved

1. Delivered a complete, user-friendly website with 5+ main sections and rich content.
2. Positive potential impact: Centralized resource to help KCGI students settle faster and explore Kyoto
3. Assessment:
    i. Content accuracy
    ii. Usability: clean navigation, mobile-friendly, accessible design
    iii. Completeness: covers academics, daily life, culture, and emergencies
    iv. Functionality : working links, interactive map

Key Learnings from the Project

- Enhanced web development, design, and programming skills (frontend, QA, full-stack elements).
- Improved leadership, collaboration, and communication in a diverse team.
- Deepened research skills and knowledge of Kyoto's history, culture, and practical living.
- Importance of user centered design for accessibility (targeting international students).
- Time management and division of roles in a group project.
